

International Medical Geography Symposium (IMGS) 2024

Sunday, July 14, 2024 - Friday, July 19, 2024

Georgia State University College of Law

Conference Program

IMGS serves as a platform for exploring the complex intersections of health, geography, and the environment. We are committed to fostering discussions and research that deepen our understanding of how geographical factors influence health outcomes. The symposium is organized around four major themes with several subthemes as described in the list below.

Global Health

Infectious Diseases

Food Insecurity

Water

Obesity

Urban and Rural Health

Refugee Settlement

Innovation in Methods

Longitudinal Analysis

GeoAI and Machine Learning

Geospatial Analysis

Digital Cartography and Visualization

Health, Justice, Human Rights, Policy & Practice

Health Disparities

Human Rights and Health

Environmental Racism and Justice

Inclusivity and Diversity

Community Engagement

Structural Determinants of Health

Healthcare Accessibility

Climate Change & Health

Environmental Health

Natural Disasters

Sustainability

Interconnected Health

Planning

Other
